## **DETAILED ACTION**

The amendment filed 05/08/2006 has been entered. Claims 49–51 and 60–65 are pending.

## New Formal Matters, Objections, and/or Rejections:

10

### **Double Patenting**

Claims 49–51 and 60–65 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 3–5 of U.S. Patent No. 6,903,071.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the specification of the patent defines the MP52 of the patent's claims as comprising an amino acid sequence that is identical to the amino acid sequence of the protein of the present claims. Hence the present claims are generic to and fully encompass the compositions of the patent's claims.

#### Conclusion

No claims are allowable.
